

DATA SHEET**MEISTER 1000 - 1200 VA**

Fully automatic twist wrapping machine for high performance requirements

Products for wrapping

Single tires and piles of tires, two-wheeler tires, special tires, all kinds of tires with and without rim, wheel rims in cardboard, packages including accessories (e.g. inner tubes, etc.) possible, cable rings, wire coils, cable reels, tube collars, etc.

Your benefits

- packaging accepted by all parcel services
- absolutely safe for transportation
- high efficiency
- extremely low cost of consumables and energy
- easy operation
- divergent products can be packed in bundles or entirely wrapped to convenience
- no set-up times required
- machine operating at low noise level

Product dimensions

Height: 50 - 500 mm

Diameter: 300 - 850 mm

other dimensions available upon request

MEISTER 1000 - 1200 VA

Wrapping/packaging materials

Cross bandage, partial packaging and entire wrapping possible using the following packaging materials:

- PE stretch film, PE film, UV protective film, coloured and printed film, etc.
- up to 125 mm width
- 76 mm core diameter

Technology

- high capacity up to 4 packages per minute achievable
- fully automatic operation
- interfaces for balances, marking and labelling systems as well as integration into commercial logistic software applications possible
- automatic product height identification and electrically driven height adjustment of the wrapping unit
- automatic film rupture detection
- automatic gadget cutting and clamping the packaging material
- adjustable product advancement speed using a frequency converter
- quick-change unit for wrapping material coils
- continuously variable film tension/strain
- PLC: Siemens
- pneumatics: Festo
